

\$399 for 1 treatment

OR

\$1050 for 3 treatments

 **SAVE ALMOST \$150!**

To Do Before:

-  Avoid sun and discontinue retinols/retinoids a few days prior. Remove all makeup prior to treatment.

To Do After:

-  Use a gentle moisturizer, use **sunscreen**, and avoid irritating/ exfoliating the skin. Wait a few days before restarting skincare regimen.

• After care guide will be provided post-treatment

Stop concealing your skin's imperfections and get the glowing results you desire.

Skin revitalization/ Photofacial is a non-surgical treatment that can improve your skin's appearance quickly and easily. This advanced intense pulsed light (IPL) based technology targets undesirable **brown spots, sun damage, redness, and vessels**, revealing clearer skin. Treatment areas include the **face, chest, hands, arms, and legs**.

How does it work?

The Max G handpiece filters light into the ideal wavelength to target melanin for pigmentation and hemoglobin for redness without harming the surrounding skin. The brown spots lighten and gently peel off the skin while redness is diminished and blood vessels shrink in size.

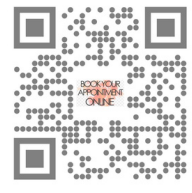

What results can I expect?

Expect to see an improvement in the appearance of brown spots, sun damage and vessels for a more even skin tone*. A series of treatments may be needed for desired results.

Treatment plans can be adjusted to fit your lifestyle.

Schedule your treatment session today**.

*Individual results may vary and are not guaranteed.

** Laser consultation fee waived with the purchase of a treatment.
